DETAILED ACTION

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. It would appear that the specification is a product of translation from a foreign document and as such contains verbiage that is awkward and non-idiomatic in nature. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims appear to be a product of translation from of foreign document and as such contains many awkward if not indefinite limitations not commensurate with U.S. claim drafting practice. The claims should be reviewed and amended to clearly set forth the applicant's invention. For example sake in claim 1, it is not clear where "overlap regions" are located with respect to the link plates or chain. What does "the overlap regions always have a central region" set forth come structure? Further what makes for "some stop faces"?

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0 856 683. EP '683 teaches (Figs. 1-3) the claimed invention including link plates 1

Art Unit: 3725

having overlap regions generally at 14 with central region 2 and at least two stop faces 5/6 and 30/32. With respect to claim 9, faces 30 have a concave profile and faces 55/6 have concave faces.

4. Claims 1-5 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 3,837,764. DE '764 teaches (Figs. 1& 3) the claimed invention including link plates 10 having overlap regions generally at each end with a central region 100/102 and at least two stop faces 20/22/24. Regarding claim 5, the third region set forth is met by the structure generally surrounding members 110/ 112. With respect to claim 9, faces 32/34/36 have a concave profile and faces 20/22/24 have concave faces.

5. Claims 6 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
